MB Builders Inc.

Fleet & Equipment Policy

Company Vehicles, Trailers, Heavy Equipment, Fuel & Driver Safety

Effective Date	9.28.2026
Version	1.0
Applies To	MB Builders employees and applicable personnel

IMPORTANT

This manual is a general policy guide. It is not an employment contract, does not guarantee employment for any period, and may be revised by MB Builders subject to applicable law. Employees should direct questions to management.

- 12. Prohibited Conduct
- 13. Company Property & Return
- 14. Corrective Action
- Appendix A - Vehicle Assignment Agreement
- Appendix B - Accident Report
- Appendix C - Equipment Operator Authorization

1. Purpose & Scope

This policy applies to employees who drive MB Builders vehicles, operate company or rented equipment, tow trailers, use fuel cards, or are assigned custody of fleet assets. Safe operation is a condition of authorization.

2. Driver / Operator Authorization

- Drivers must hold the license and endorsements legally required for the vehicle being operated.
- Operators must have required training, qualifications, and company authorization for the equipment assigned.
- MB Builders may review driving records, license status, training records, insurability, and job performance before or during authorization.
- Employees must immediately report suspension, revocation, restriction, expiration, disqualification, or other change affecting legal or safe operation.

3. Take-Home Vehicles & Personal Use

MB Builders may assign employees a vehicle to take home when doing so supports dispatch, travel efficiency, or business operations. A take-home vehicle remains company property.

Personal use is prohibited unless the employee receives prior permission from an authorized manager. Incidental stops reasonably connected to the work commute may be addressed by management case by case. Family members, friends, and other unauthorized persons may not drive a company vehicle.

4. Driver Responsibilities

- Operate defensively and obey traffic laws.
- Maintain a valid license and required medical/qualification documentation when applicable.
- Secure tools, materials, ladders, cylinders, and cargo.
- Keep the vehicle reasonably clean and report mechanical issues promptly.
- Do not permit unauthorized passengers or drivers.
- Protect keys, fuel cards, registration, insurance information, and company property.

5. Distracted Driving & Seat Belts

Seat belts must be worn by the driver and all occupants whenever the vehicle is in motion. Drivers may not text, type, read messages, watch video, or otherwise use a handheld device in a manner prohibited by law or that creates unsafe distraction. Pull over safely before handling communications that cannot be managed lawfully and safely.

6. Vehicle Inspections & Maintenance

Drivers must conduct appropriate pre-trip or pre-use checks based on the vehicle and applicable requirements. Check tires, lights, mirrors, glass, brakes, fluid leaks, load securement, safety equipment, and obvious damage. Commercial motor vehicles and regulated equipment require any additional inspections/documentation required by law.

Do not continue operating a vehicle with a condition that makes it unsafe. Report warning lights, damage, unusual noises, tire issues, brake concerns, or overdue service promptly.

7. Fuel Cards & Expenses

- Fuel cards are for authorized company business only.
- Use the correct fuel/product and enter required odometer, PIN, vehicle, or receipt information.
- Do not purchase personal fuel, food, tobacco, alcohol, cash equivalents, or unauthorized merchandise.
- Report lost/stolen cards or suspicious transactions immediately.
- Receipts must be submitted when required by accounting procedures.

8. Trailers, Towing & Load Securement

- Use a tow vehicle, hitch, ball/pintle, safety chains, breakaway system, and trailer rated for the load.
- Inspect tires, wheels/lugs, lights, brakes, coupler, jack, chains, ramps, and load securement before travel.
- Distribute and secure loads appropriately and comply with applicable weight, dimension, and cargo-securement requirements.
- Only authorized drivers may tow company trailers.

9. Heavy Equipment Authorization

Only trained and authorized employees may operate heavy equipment or powered industrial/mobile equipment. Authorization may be equipment-specific and project-specific. Operators must complete required inspections and follow manufacturer limitations, site traffic plans, spotter requirements, seat-belt/restraint rules, and company safety procedures.

10. Accidents, Damage & Breakdowns

1. Stop safely, protect the scene, and call emergency services when appropriate.
2. Provide reasonable aid within your training and cooperate with law enforcement.
3. Notify forman as soon as safely possible.
4. Exchange required information, but do not speculate about fault or make unauthorized commitments on behalf of MB Builders.
5. Photograph the scene, vehicles, damage, roadway, and relevant conditions when safe and lawful.
6. Complete the company accident report and cooperate with insurance/company investigation.
7. If management has reasonable suspicion of impairment, follow the company's testing/transportation procedure.

11. Motor Vehicle Records & License Status

As a condition of driving authorization, employees may be required to consent to lawful motor-vehicle-record checks and provide information reasonably necessary for insurance qualification. MB Builders may suspend driving privileges based on license status, insurability, serious violations, preventable incidents, or unsafe driving behavior.

12. Prohibited Conduct

- Driving while impaired, fatigued to an unsafe degree, or medically unable to drive safely.
- Reckless driving, racing, aggressive driving, or intentional misuse.
- Unauthorized personal use or unauthorized drivers.
- Disabling telematics, cameras, safety devices, governors, or other installed systems without authorization.

- Transporting illegal drugs, unauthorized weapons where prohibited by company/site policy or law, or other unlawful contraband.
- Using company vehicles for outside employment or side work without written approval.

13. Company Property & Return

Vehicles, trailers, keys, toll devices, fuel cards, tools, electronics, records, and accessories remain company property. Employees must return assigned property upon request, reassignment, extended leave when directed, or separation from employment.

14. Corrective Action

MB Builders may use coaching, retraining, temporary or permanent loss of driving/operator privileges, reassignment, corrective action, or termination depending on the circumstances. Nothing in this policy guarantees progressive discipline.
